Software Engineer - Intern

Dear Hiring Manager,

I am excited to apply for the Software Engineer - Intern position at PakWheels. With 1 year of experience in the MERN stack, I am confident in my ability to contribute to your team and learn valuable skills in a professional environment.

As a software engineer, I have experience in developing and maintaining web applications using the MERN stack, which includes MongoDB, Express.js, React.js, and Node.js. I have experience working with front-end technologies such as HTML, CSS, and JavaScript, as well as back-end technologies such as RESTful APIs, SQL, and NoSQL databases.

In my previous role, I worked on developing responsive web applications, improving performance, and ensuring the scalability and security of the software. Additionally, I have worked in an Agile development environment, collaborating with team members to complete projects and meet deadlines.

I am excited about the opportunity to work at PakWheels, a company that values innovation and teamwork. I believe my skills and experience in the MERN stack make me a strong candidate for this position. I am eager to learn new technologies and contribute to the development of innovative solutions at your company.

Thank you for considering my application. I look forward to the opportunity to discuss my qualifications further.

Sincerely,
Hamza Basir Malik
